1. PRODUCT AND SUPPLIER INFORMATION

SUPPLIER: Primetac
223 Gates Road
Unit E
Little Ferry, NJ 07643
Phone (201) 440-3806 Fax (201) 440-4956

PRODUCT: CARTON SEALING SELF ADHESIVE TAPE, adhesive tape rolls, wound on carton cores, packed in polyethylene and carton boxes. Tape is not designed for direct contact with food.

2. COMPOSITION - RAW MATERIALS INFORMATIONS

Support: PVC emulsioned film
Adhesive: natural rubber, hydrocarbon resins, hexane.

3. SANITARY INFORMATIONS AND PRECAUTIONS

1) Contact with eyes
Wash immediately with water for 5 minutes at least.
Only mechanical irritation.

2) Contact with skin
Wash with water and soap the contact zones.

3) Prolonged inhalation
The eventual and improbable prolonged inhalation of vapor, fumes of tape asks to breath fresh air.

4) Ingestion
Do not cause vomit. Contact a doctor.

4. RISK NOTES

1) Contact with eyes
The adhesive is just irritating; it does not cause ocular injury.
2) **Contact with skin**
Low level of toxicity; repeated local contacts may cause irritation and dermatitis in subjects sensitive to the components.

3) **Prolonged inhalation**
Risk negligible; high vapors concentrations are irritating for the mucosa in general.

4) **Ingestion**
Low level of toxicity. Even if there are no negative effects; tape is not designed for direct contact with food.

5. **LIMIT VALUE**
Limit dose: 4000 mg/kg body weight - toxic if ingested over this value.
FURTHER TOXICOLOGICAL DATA ARE AVAILABLE IF REQUIRED

Personal protection: wear gloves.

6. **FLAMMABILITY AND EXPLOSION DATA**

- Flash point: 380°C
- Explosivity limits: Not applicable
- Auto-ignition temperature: >400°C

7. **FIRE AND EXPLOSIVITY LIMITS**

- Low risk level. The product may burn if in contact with flame or if heated over the flammability temperature (>400°C).
- Eliminate every flame and possible sources of ignition.
- Avoid the contact with oxidizing materials.

8. **FIRE PROTECTION AND PREVENTION**

- Eliminate every source of ignition.
- Fast spreading fire can be expected in palletized storage caused by the presence of horizontal air spaces formed by the pallets.
- Use a solid stream of water (from a safe distance) to cool the surfaces of the burning materials and to protect people.
- Make sure that fire is not supplied.
• Extinguish the residual fire using chemical powders, CO₂ and/or water.
• Avoid to breath smoke.

9. PRECAUTIONS AGAINST SPREAD OUTS

GROUND SPREAD OUTS
– Collect rejects, not used parts and put them in appropriate containers.

SPREAD OUTS IN THE WATER
– Collect rejects, not used parts and put them in appropriate containers for recover and discharge.

10. PHYSICAL AND CHEMICAL CHARACTERISTICS
– Composition: PVC tape + adhesive (rubber + resins)
– Boiling point: not applicable;
– Specific weight: 0.9 - 0.95 g/cc;
– Viscosity: not applicable;
– Specific weight of vapor (aria <1): not applicable;
– Solubility in water at 20°C: insoluble;
– Auto-ignition temperature: > 400°C;
– Physical state: solid;

11. REACTIVITY AND STABILITY
– Stability: chemically stable;
– Dangerous polymerization: none;
– Materials to avoid: strong oxidizing - strong acids;
– Dangerous combustion products: CO, CO₂, nitrogen oxide; monovinyl cloride
– Dangerous degradation products: monovynil cloride;

12. TRANSPORT AND STORAGE
– Transport and storage: trucks, wagons
– Transport and storage temperature: room temperature - to be stored in a ventilated place
– Electrostatic discharge risks: avoid electrostatic discharge.

Materials and recovers
– Proper: Carton boxes, plastic film.
– Unfit: //
13. DANGER CLASSIFICATION
- UN number: not classified;
- IMQ Class: not classified;
- ADR Class: not classified;
- CEE Classification: not ruled;
- CEE risk phrases: none;
- CEE safety phrases: none;
- Label: self adhesive tapes in polypropylene;

14. ENVIRONMENTAL IMPACT DATA
The commodity may cause over a long-time, some negative effect on the aquatic environment, being not degradable.

15. DISCHARGE NOTES
The supplied commodity can be discharged according with the local normative laws. When it is used together with other products, it should be indicated another way of discharge. In case of doubts, contact the suppliers. Adhesive tapes are packaging aids, which are not supposed to hinder the recycling process. This requirement is met when they disintegrate as little as possible in the slushy phase and can be completely separated in the pulpier or in the following sorting phase. In the case of thermal recycling, the adhesive tape, which has been sorted, does not cause harmful emissions.
